

MINUTES OF MEETING

Evening Standup Call - Hypotenuse Analytics

Meeting Info

Organizer:	devanshi@hypotenuseanalytics.com
Date & Time:	04 Sep 2026, 07:30 PM IST
Attendees:	19 participant(s)
Meeting Link:	https://meet.google.com/xnk-ruta-xgj

Meeting Notes

General & Administrative

- **Website Updates:** Harsh Vardhan assigned Devanshi Jaiswal to update the website team members, specifically removing Arvind and adding new members.
- **Selection:** The team has been selected for a program with the Telecom Department, involving an event in Delhi in October with potential travel support.
- **Internal Pitch Practice:** Harsh Vardhan proposed holding "town hall" sessions where he will present the company's vision as if pitching to investors. This will help align the team and refine the message.
- **New Joiner:** Welcomed Suryaansii Singh back. Harsh Vardhan mentioned that Devanshi Jaiswal and Suryaansii Singh will collaborate on creating viral marketing content.

Project: Surveillance & Intelligence Dashboard

- **Module Structure:** Discussed the need for clear separation of modules: "Surveillance Intelligence," "User Reality Test Center," and "Critical Infrastructure Intelligence."
- **Dashboard Features:** Prakher Saxena presented the command center dashboard, highlighting features like live video feeds, multiple camera connections, zone-based alerts (e.g., parking zones), and customizable rule-based monitoring.
- **Improvements Needed:** Harsh Vardhan pointed out missing headers, requested clearer data source representation (LiDAR, CCTV, sensor data), and suggested adding a dedicated button for web push alerts. The dashboard should also allow for natural language search of events and show data health/insights.

- **POC Opportunities:** Harsh Vardhan mentioned potential POC opportunities with a security company managing over 50 societies.

Project: 3D Assets & Digital Twin Rendering

- **Rendering Engine:** Nachiket B and Lakshit Gupta discussed using Blender and its neural engine for cinematic video rendering, planning to shift to different engines for better performance.
- **Key Technical Challenge:** A major bottleneck is the size and optimization of 3D assets. Current digital twins are large (~13MB), causing performance issues. Lakshit Gupta detailed research into various compression techniques (glTF, message format, CUDA/GPU optimization) to reduce file sizes for web delivery.
- **Proposed Solution:** Lakshit Gupta is exploring running digital twins on a GPU instance for optimization and considering a domain-based architecture (e.g., twin.hypotenuse.com) to manage caching and reduce latency. A system design and architecture plan is needed.
- **Task:** Lakshit Gupta and Satveek Gupta are tasked with designing a robust "knowledge platform" starting Monday.

Other Technical Discussions

- **API & Caching:** Prakher Saxena mentioned multiple API providers are available for selection. Lakshit Gupta and Satveek Gupta discussed caching challenges with Cloudflare and the need for a proper architecture, estimating initial traffic at up to 500 requests.
- **Infrastructure:** Debated cloud vs. edge computing, noting that many target customers (SMBs) might not prioritize data security, while government and defense sectors would not use cloud solutions.
- **Development Tools:** Mentioned issues with AI coding assistants like ChatGPT sometimes being unavailable. Lakshit Gupta uses OpenCode for development.
- **Edge Cases:** Harsh Vardhan shared an example of an US-based tool that uses camera insights to trigger actions (e.g., a pressure gun for animals), illustrating the potential for edge-based intelligence.

Memorable Quotes

"If we are not brainstorming. If we are not the things interactive. 🤖 mute 🤖 🤖 🤖 🤖 🤖 🤖 🤖 please guys." - Harsh Vardhan "Our intention is very pure. We build something meaningful, not like others who are now only monetizer things and pivot around the gig workers and all." - Harsh Vardhan "Once I will back from Lucknow, you all will become investor. I will sell my idea to you." - Harsh Vardhan

ACTION ITEMS

#	Action Item	Assigned To	Deadline
1	Update the website by removing Arvind and adding new team members.	Devanshi Jaiswal	N/A
2	Review the dashboard improvements suggested by Harsh Vardhan (add headers, clear data source representation, add alert button, etc.).	Unassigned	N/A
3	Conduct research and explore optimization techniques for 3D assets to reduce digital twin file sizes for web delivery.	Lakshit Gupta	N/A
4	Design a system architecture for a digital twin platform, potentially using GPU instances and a domain-based structure.	Lakshit Gupta	N/A
5	Work with Satveek Gupta starting Monday to design and build a knowledge platform.	Lakshit Gupta	N/A
6	Work with Lakshit Gupta starting Monday to design and build a knowledge platform.	Satveek Gupta	N/A
7	Create a plan for the new system architecture by tomorrow morning.	Satveek Gupta	N/A
8	Update the surveillance dashboard with the suggested changes (headers, alerts, data representation).	Prakher Saxena	N/A
9	Coordinate with Lakshit Gupta on testing different rendering engines for cinematic videos.	Nachiket B	N/A
10	Coordinate with Harsh Vardhan on creating viral marketing content/images.	Devanshi Jaiswal	N/A
11	Coordinate with Harsh Vardhan on creating viral marketing content/videos.	Suryaansii Singh	N/A
