Meeting Notes

Technical Updates & Surveillance Systems

- Lakshit Gupta discussed ASCII development, IP documents, and backlog management.
- Performance changes were noted, with some instances deleted and then restored.
- Shyam Narayan Nayak and Prakhar Saxena have a meeting planned to discuss the Frigate surveillance system implementation and compare it with Nvidia's version. They noted benchmarks are similar, but memory usage and the current version seem better for their use case.

Document & File Management

- Harsh Vardhan expressed frustration over the lack of organized document management, stating he is tired of repeatedly explaining the process.
- He instructed Devanshi Jaiswal to create a structured folder (using Linktree) with all necessary documents (originals, IP filings, certificates, etc.) in one place for Satveek Gupta's reference.
- This is flagged as a top priority task.

Marketing, Lead Generation & Landing Pages

- Shrish Raghuwanshi is working on redesigning landing pages and needs content input for key sections (hero section, taglines).

- Harsh Vardhan explained the strategy for lead generation: creating separate, project-specific landing pages for different sectors (e.g., critical infrastructure, surveillance intelligence) to run targeted Google Ads, rather than directing all traffic to the main corporate website.
- Devanshi Jaiswal was tasked with coordinating with Satveek Gupta on lead generation efforts.

HR & Team Updates

- Anvesh Mishra mentioned finalizing HR punch designs (color theme, typography).
- Harsh Vardhan inquired about an employee's health and their expected return to work.
