Meeting Info

Organizer: devanshi@hypotenuseanalytics.com
Date & Time: 27 Aug 2026, 12:34 PM IST
Attendees: 1 participant(s)
Meeting Link: meet.google.com/rwz-qiy-c-ush

Meeting Notes: Hypotenuse Analytics Pitch

Participants

- **Hypotenuse Analytics Team:** Harsh Vardhan (CEO & Founder), Devanshi Jaiswal (Co-founder), Prakher Saxena (Product & Tech Lead)
- **Investor:** Aakash Jain

Introductions & Background

- **Harsh Vardhan:** Founder & CEO with over a decade of experience at KPMG and IBM. Former founding member of housing.com and a 2x founder. Alumni of IIT Delhi.
- **Devanshi Jaiswal:** Co-founder, a fourth-year student from Bennett University. Winner of multiple hackathons, including Google's Agent Tech Air and OpenAI's Next Wave hackathons.
- **Prakher Saxena:** Handles the product and technical aspects. Also a fourth-year student with experience at a legal startup and Trend Micro.

Company Overview & Core Solutions

- Hypotenuse Analytics is building an AI platform positioned as a "refinery" for raw data, turning it into actionable truth through prediction and verification.
- **Three Verticals:**
- **Critical Infrastructure Monitoring:** Uses AI to monitor structures (buildings, dams, bridges) from the construction stage, not just at end-of-life. They add an intelligence layer over legally mandated sensors and cameras to predict failures and anomalies like sinking or tilting.

- **Enhanced Surveillance:** Transforms existing CCTV systems from passive recorders into proactive alert systems. The AI layer can identify suspicious activity and provide timestamped clips, similar to a "Control+F for video."
- **Reality Testing (Deepfake Detector):** A live product (soft-launched August 15) that detects AI-generated content and deepfakes. Key differentiators: it works on any video/email, provides explainability ("why" and "source" of the fake), and offers a unique Chrome extension for real-time checks.

Traction & Market

- The deepfake detector has received over 85,000 hits and media coverage from 120+ outlets in under 20 days.
- Target customers are large enterprises with critical infrastructure (e.g., DRDO, Reliance, Adani) and media/BFSI sectors for verification tools.
- Noted the large market opportunity due to government mandates (e.g., EU requiring AI on railway tracks, India's bullet train projects).

Business Model & Ask

- Currently bootstrapped by Harsh Vardhan; the deepfake tool is free to gain traction.
- Seeking ~1.5 CR for a pre-seed round to fund prototype development, IP creation, and edge hardware for on-premise solutions (critical for security-conscious clients).
- Budget for prototypes and IP is approximately 77 Lakhs.

Technology & Unique Approach

- **Hybrid Cloud & Edge Architecture:** A key differentiator, designed for enterprises that cannot share data on public cloud (e.g., defense).
- **Digital Twin:** Showcased a pilot digital twin of Noida for urban planning, integrating real-time traffic, AQI, and rain simulation data for town planners.
- **Team & Advisors:** Strong team with backgrounds from IITs, Bennett University, and advisors from IIT Bombay, IIT Roorkee, and ex-RDO. They have received grants from AWS, NVIDIA, and FICCI.

Next Steps

- Aakash Jain will review the materials internally and get back with thoughts and questions by the next week.

Memorable Quotes

"We at Hypotenuse, we position ourselves as a refinery. We take raw signal, raw data, and we turn it into actionable truth." - Prakher Saxena
 "If you look at the deep fake part, how do we detect? ... Our innovation is we work simply on every and any kind of

video or emails." - Prakher Saxena "We really talk about the deep tech, which can make human life better. A sovereign AI platform which India can have a proud of." - Harsh Vardhan

ACTION ITEMS

#	Action Item	Assigned To	Deadline
1	Send the media coverage documentation and other detailed materials to Aakash Jain.	Unassigned	N/A
2	Prepare to answer any follow-up questions from Aakash Jain regarding the business model, technology, or funding ask.	Unassigned	N/A
